Subject: Application for the EVS Nom de la mission

Dear Madame, Sir

I am writing to you about your EVS proposal "Nom de la mission" in Ville. I am strongly interested in this mission and fully available for the period requested (from now to 30/06/2019). I, therefore, allow myself to submit my application.

I have had for several months, the desire to help the others. Working with youngsters with disabilities represents a project that makes sense. Indeed, I already worked with children as a school supervisor. During this time, I used to organize and animate different types of activities in elementary schools. I was also responsible for the children's safety. Working with youngsters with disabilities will be a new challenge for me but thanks to my background I will adapt well to this new opportunity.

I am also very interested in sport. In fact, I used to play football in a local club and I organized several sports activities with children, like football practices, basketball tournaments and others sports games. I would like to share my passion with the youngsters of Bialystok.

This volunteering will allow me to develop some professional skills. I hold a professional trade and marketing degree obtained in September 2018. Next year, I would like to do a Master degree in marketing and business. Thanks to this volunteering, I will improve my English but also develop organizational and communicational abilities and my sense of responsibility. Those are qualities needed to work in my field.

Finally, spending five months in Poland will be a great opportunity to discover a new culture and to be more open-minded. I

My work experiences allowed me to gain a capacity of listening, a relational sense and a good team spirit. Ambitious and organized, I appreciate that I am given responsibilities and can show initiative. This is why I think that I will be the perfect volunteer for this mission.

Hoping that my application will catch your attention, I remain at your disposal for a possible Skype interview.

Yours faithfully.
